

Attachment: tx018b01
Housing Authority of the City of Lubbock
Deconcentration Policy

To implement the statutory requirement to deconcentrate poverty and provide for income mixing in covered developments, the PHA must comply with the following steps:

Step 1. The PHA must determine the average income of all families residing in all the PHA's covered developments. The PHA may use the median income, instead of average income, provided that the PHA includes a written explanation in its annual plan justifying the use of median income.

PHA Policy

The PHA will determine the average income of all families in all covered developments on an annual basis.

Step 2. The PHA must determine the average income (or median income, if median income was used in Step 1) of all families residing in each covered development. In determining average income for each development, the PHA has the option of adjusting its income analysis for unit size in accordance with procedures prescribed by HUD.

PHA Policy

The PHA will determine the average income of all families residing in each covered development (not adjusting for unit size) on an annual basis.

Step 3. The PHA must then determine whether each of its covered developments falls above, within, or below the established income range (EIR), which is from 85% to 115% of the average family income determined in Step 1. However, the upper limit must never be less than the income at which a family would be defined as an extremely low-income family (federal poverty level or 30 percent of median income, whichever number is higher).

Step 4. The PHA with covered developments having average incomes outside the EIR must then determine whether or not these developments are consistent with its local goals and annual plan.

Step 5. Where the income profile for a covered development is not explained or justified in the annual plan submission, the PHA must include in its admission policy its specific policy to provide for deconcentration of poverty and income mixing.

Depending on local circumstances the PHA's deconcentration policy may include, but is not limited to the following:

- Providing incentives to encourage families to accept units in developments where their income level is needed, including rent incentives, affirmative marketing plans, or added amenities
- Targeting investment and capital improvements toward developments with an average income below the EIR to encourage families with incomes above the EIR to accept units in those developments

- Establishing a preference for admission of working families in developments below the EIR
- Skipping a family on the waiting list to reach another family in an effort to further the goals of deconcentration
- Providing other strategies permitted by statute and determined by the PHA in consultation with the residents and the community through the annual plan process to be responsive to local needs and PHA strategic objectives

A family has the sole discretion whether to accept an offer of a unit made under the PHA's deconcentration policy. The PHA must not take any adverse action toward any eligible family for choosing not to accept an offer of a unit under the PHA's deconcentration policy [24 CFR 903.2(c)(4)].

If, at annual review, the average incomes at all general occupancy developments are within the EIR, the PHA will be considered to be in compliance with the deconcentration requirement and no further action is required.

PHA Policy

For developments outside the EIR the PHA will take the following actions to provide for deconcentration of poverty and income mixing:

LHA implemented the preference for working families to promote deconcentration of poverty and income-mixing.

If necessary, the PHA may skip families on the waiting list to accomplish compliance with the EIR.

Order of Selection [24 CFR 960.206(e)]

The PHA system of preferences may select families either according to the date and time of application or by a random selection process.

PHA Policy

Families will be selected from the waiting list based on preference. Among applicants with the same preference, families will be selected on a first-come, first-served basis according to the date and time their complete application is received by the PHA.

When selecting applicants from the waiting list, the PHA will match the characteristics of the available unit (unit size, accessibility features, unit type) to the applicants on the waiting lists. The PHA will offer the unit to the highest ranking applicant who qualifies for that unit size or type, or that requires the accessibility features.

By matching unit and family characteristics, it is possible that families who are lower on the waiting list may receive an offer of housing ahead of families with an earlier date and time of application or higher preference status.

Factors such as deconcentration or income-mixing and income targeting will also be considered in accordance with HUD requirements and PHA policy.
